---

## Summary

---

To secure a challenging position as a Mainframe Developer in an Insurance Annuity project with a focus on creating scalable, efficient and maintainable systems.

## Experience

---

**DXC Technology | Hyderabad, Andhrapradesh**

**Associate Professional Software Engineer | 06/2022 - Present**

- Worked on the development and support of a large-scale insurance annuity system using COBOL, JCL, DB2, CICS, and VSAM.
- Collaborated with the business analysts to gather and analyze requirements for the system.
- Designed and developed new features and functionality for the system.
- Resolved issues and provided maintenance support for the system.
- Conducted thorough testing to ensure the quality of the system.
- Provided technical guidance and support to junior developers.
- Worked with project managers to create project plans and timelines.
- Followed Agile methodologies to ensure project delivery within schedule and budget constraints.

## Technical Skills

---

- Proficient in COBOL, JCL, DB2, CICS, VSAM, and IBM z/OS operating system and associated utilities
- Experience in developing and supporting insurance annuity systems
- Knowledge of Life Insurance and Annuity products and processes
- Proficient in SQL and data analysis
- Experience with Agile development methodologies
- Familiarity with mainframe development tools such as IBM Rational Developer for z/OS

## Skills

---

COBOL, JCL, DB2, VSAM, SQL, Mainframe, Data Analysis Skills, Power BI, Python, Excel

## Education

---

**Raghu Engineering College | Visakhapatnam, Andhrapradesh**

**Bachelor of Technology - ECE | 05/2022**

1. Obtaining a good GPA (8.2) throughout the degree program
2. Receiving scholarship for academic excellence in their field of study
3. Publishing research papers in peer-reviewed journals or presenting at academic conferences

## Projects

---

### Annuities

Designed and implemented a new annuity product feature for the insurance annuity system using COBOL, JCL, DB2, and CICS. The project resulted in increased efficiency and accuracy in annuity product processing for the client - Equitable(EQH).
